

## ADIGRAF BLOCK PRINTING MEDIUM - DRYING

Adigraf Block Printing Drier Medium is formulated to speed up the drying time of water-soluble block printing inks, improving efficiency in the studio. When mixed with Adigraf inks, it can reduce drying time by around half without affecting colour vibrancy or print quality. Ideal for artists working in multiple layers within a single printmaking session. **Key features**

- Significantly reduces drying time
- Designed for Adigraf water-soluble inks
- Supports efficient multi-layer printing
- Maintains bright and vibrant colours
- Made in the United Kingdom

### Technical specifications

- Type: drying medium for block printing
- Compatibility: Adigraf water-soluble inks
- Drying time reduction: up to approx. 50%
- Range: Adigraf accessories
- Origin: United Kingdom
