

PURE GINBARI SILVER LEAF

Japanese-made Ginbari silver leaf with a controlled thickness of 10–12 µm and a large 230 × 230 mm format, designed for advanced artistic applications. Ideal for enamelling on metal, lampworking and glass fusing, it offers greater handling stability than ultra-thin leaf while still interacting beautifully with heat and firing to create deep reflections, layered metallic effects and luminous surfaces. **Key features**

- Ginbari silver leaf for professional artistic applications
- 10–12 micron thickness for improved handling stability
- Large 230 × 230 mm sheet format
- Suitable for enamelling, lampworking and glass fusing
- Creates luminous effects, depth and dynamic colour variations
- Made in Japan

Technical specifications

- Material: silver
- Thickness: 10–12 µm
- Sheet size: 230 × 230 mm
- Format: single sheet
- Production: Japan
- Applications: artistic enamelling on metal, lampworking, glass fusing, decorative inserts
