

## FLÜSSIGE TRANSPARENT GLASUR HST SERIEN

### Liquid glazes

These Glazes are used on mature bisque.

The recommended firing temperature is 950C-980C.

Glazes can be intermixed to obtain new colors, except for colors red and yellow (#12889-#12907) that are cadmium-selenium colors and can only be intermixed with each other to create orange.

Can be applied with brush or sponge.

If thinning is necessary, add a small amount of water and mix well.
