

## LEAD POWDERED THIRD FIRE COLOR HTP SERIES

HTP Third-Firing colours are a lead-content series that gives brightness to the colours, even at low temperature. The 42 colours range is indicated to be used between 720°-820°C (Orton cone SSB 018-015) in relation to the hardness of the underlying ceramic and glass. Third Firing colours are supplied in powder to be mixed with a specific medium. All HTP colours are intermixable.
