

FUSELINE - GLASS & METAL LIQUID ENAMEL PENS

The new Fuseline liquid enamels can be applied to various surfaces, including glass, metals (such as copper or silver), and ceramics. Completely non-toxic and lead-free, these liquid colors are ready to use. Simply apply them directly to the desired surface for rich, glossy colors. For precise application, we recommend purchasing the applicator set that screws directly onto the color jar.

Key Features:

- **Applicable on multiple surfaces:** Glass, metals, and ceramics.
- **Non-toxic and lead-free:** Safe and easy to use.
- **Ready to use:** Liquid colors for brilliant results.
- **Precise application:** Use the nozzle set, code 44070, for ease of use.

Key Features

- 20 colors, liquid & ready to use
- Water based & Lead Free
- Use nozzle set 44070, for precision work
- Use on metals like copper or silver, torch or kiln fire (temperature 750 - 850°C)
- Use on any COE glass (temperature 750 - 790°C)

INSTRUCTIONS

- Mix well before use.
- Use nozzles for easier enamel dispensing.
- Allow to dry completely before firing.

Recommended firing temperatures and methods:

- **Glass:** 750°C - 790°C, compatible with any type of glass.
- **Metals:** 750°C - 850°C, oven or torch firing.
