

POWDER WOOD STAINS

Powder wood stains are water-dispersible and ideal for coloring window frames, doors, wooden objects, or furniture. The intensity of the color varies depending on the amount of powder used. All powder stains can be mixed together to create the desired shades.

Key Features:

- **Water-dispersible:** Easy to use for coloring various wooden objects.
- **Adjustable intensity:** The amount of powder determines the color strength.
- **Mixable:** Can be mixed to create a wide range of custom shades.

INSTRUCTIONS

- Dissolve 2 tablespoons of base color in half a liter of boiling water.
- Check the color and adjust the dosage until the desired shade is achieved.

Color / Size	6 ML	100 ML	1 KG
Ebony	46685	46693	46701
Mahogany	46686	46694	46702
