

## WATER-BASED POWDERED WOOD COLOURS

**Water-soluble powder colors** are ideal for wood coloring. Thanks to their good light stability, they are compatible with water-based varnish products. They can be mixed together to achieve intermediate shades.

### INSTRUCTIONS

- Dissolve 1 to 2 parts of color in 100 parts of hot water to obtain the desired shade.
- Stir well, ensuring the color is completely dissolved.
- Before use, test on a hidden part or scrap wood to check color intensity.
- Apply preferably with a brush, following the grain direction of the wood.
- Before the color dries, use a damp sponge to even out the color.
- Allow to dry for at least 4 hours.
- For optimal results, repeat the coats.

Color / Size	6 ML	100 ML	1 KG
Auramine Yellow Extra	46709	46719	46729
Tartrazina Yellow	46710	46720	46730
Orange	46711	46721	46731
